Neihu Safe Community Annual Report, 2006~2008

[Indicator 1]

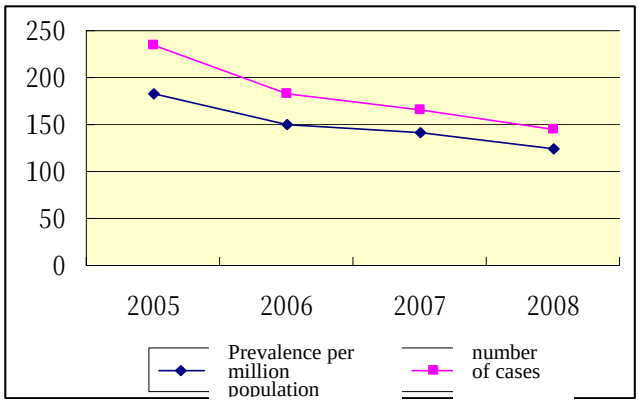
After Passing the certification in 2005, the role of the promotion principal of Neihu Safe Community - "Neihu Safety and Health Promotion Association" has switched from a leader to a supervisor, and has established "Operation Committee", by the regional public sector units (police department, fire department, social affairs, health center, etc.) as well as district hospitals, school etc., and have division officer become the head of the committee who would be responsible for the practical implementation of safety promotion programs; In addiction, the goal is to promote, "Let's continue to move towards pluralistic safe and healthy environment in Neihu"; therefore, there are four additional working groups are added.

[Indicator 2-5]

(1) 2006:

Home Safety Promotion

According to injury data analysis, children aged under 4 got injured mostly at home. In 2005, Women's Association used, "Household visits" approach advocacy to improve home safety. From 2006, this promotion has changed to "Household Safety program" along with home visits and self-assessment forms. From 2005 until now, the children injury ratio has declined over time.



2005-2008 children (0-4 year-old) injury data

Sports and Recreation Safety Promotion

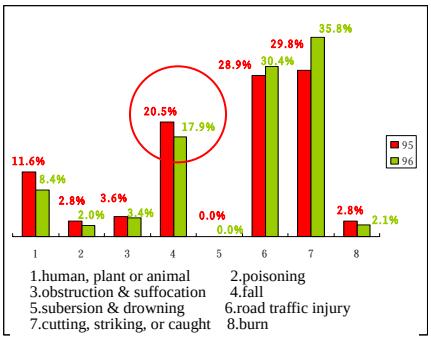
With two natural lakes, Avon Lake and Great Lake, 9 main hiking trails and 53 neighborhood parks, Neihu is a good place for leisure and entertainment. But injury cases were heard time after time. Therefore, in 2006, we designed the "neighborhood parks, the hiking trails checklist", and had large-scale of field check. All

findings reports were submitted to related maintenance units to improve, and then inspection work was listed as a two-months routine check of public sectors.

(2) 2007:

Road Safety Promotion

The unsafe pedestrian walking environment usually leads to fall, traffic injuries and other injuries. We found that by the end of 2006, most fall injuries took place on sidewalks in this district. Therefore, in April 2007, we began implementing the “Repair Inspection Plans on unsafe sidewalks, and bridges" to identify the leading factor of the injury occurrence, the problems were gradually improved in May. Indeed, the effect on the quality of the environment to reduce fall injury by the improvement of sidewalks, bridges, etc. is obvious .



The comparison of different kinds of accidents (2006~2007)

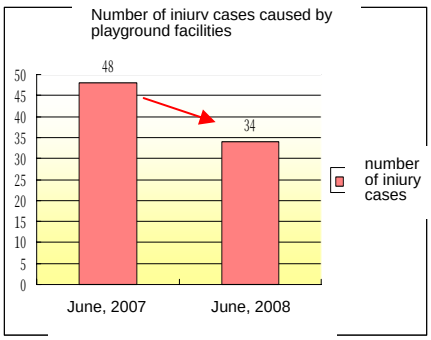
	2006	2007
Arcade/Corridors	19	18
Footpaths (include overpass & underground passage)	62	13
Pools/Gutters	1	2
Wells/cavities/holes	1	1
Stairs/Slopes	14	7
Trees	2	0
Ladders	1	1
Scaffolds	0	1

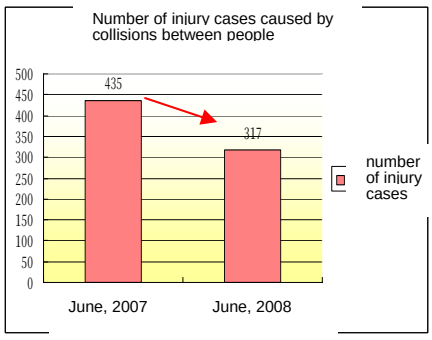
Comparison of accidents caused by different environment and equipments(2006~2007)

(3) 2008:

School Safety Promotion

According to the 2007 analysis of injury data in Neihu district, we found injuries’ occurrence in the school's recreation center ranked in the 5th. Most injuries happened to primary school children are due to the school playground and related facilities. Therefore, we launched "Campus safety vanguard project" to implement the safety precautions on campus to promote safety in 2008. First, the program was implemented in one selected elementary school. The effect is obvious to all. The implementation is expected to be expanded in 2009.

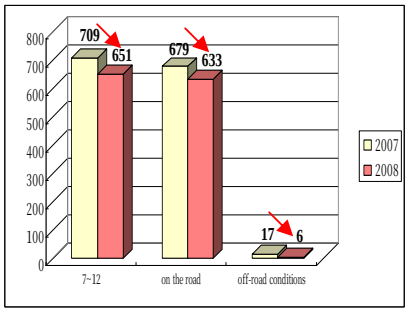




Road Safety Promotion

Continued " Road condition improvement around Neihu MRT construction area " from year 2005, in April 2008, a large-scale review on the unsafe places on the surrounding environment was performed along the Neihu MRT line, and a subsequent improvements was started in May, and a assessment on the effect of injury prevention on fall injuries, and road injuries was conducted. We found from the assessment result that the improving on the environment surrounding the road of sections of constructions on the MRT is a great help for road transportation injury prevention programs.

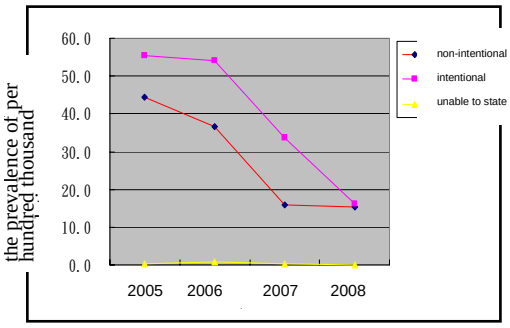
number of falling injuries in 2007, 2008



number of road injuries in 2007, 2008

Intentional Injury Prevention

In order to expand the advocacy on intentional injury prevention, we set up reminder posters in a hypermarket which sells charcoals in Neihu district, and publish articles on governmental publications on describing the construction profile of the Neihu Community Intentional Injury Prevention Network, so that people can have an immediate access to relevant information and to seek help with the pipeline. It is expected to increase co-advocacy in the stores in 2009. Let's send warmth to every corner of Neihu district with love, and have intentional injury cases decrease year by year.



accidental generic trends on intentional/non-intentional injuries in Neihu District（2005~2008）

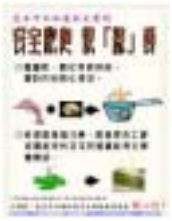
Patient Safety Promotion

For high-risk group of people having chronic disease and continuous using prescript medication which is not highly secured, we designed drug safety labeling stickers, using the questionnaire that stated satisfaction before and after in the analysis. 200 questionnaires were sent out, of which 38 elders thought the use of the stickers on the bag had a great help for the issue of forgetting to take medicine, 46 elders thought it helped improve the problem of taking the wrong medicine, 42 elders thought it helped remind taking medicine in the right time, 48 elders thought it helped improve wrong dosage problems; and further, 82.8% of the elders thought it helped reduce the chances of making mistakes.

.

Pesticide and Food Safety Promotion

In recent years, news reported several cases of food consumption by improper methods leading to injury incidents. There are hypermarkets everywhere in Neihu, common advocacy with stores of food product safety is urgent. Therefore, the food safety was promoted in 2008 along with a store in the festival season and was expected to increase the co-advocacy of the store in 2009.



[Indicator 6]

International Commitment:

2006:

1. Taiwanese Safe Community Development Conference, TCSPC
2. Community Development Workshop, Health Department of Taipei City Government

2007:

1. Shih Hsin University Journalism Department learning exchanges
2. Peking University, Wu Ji-Song Dean visited the Neihu Safe Community
3. Tungshih Safe School Symposium
4. The first Taiwan Health Month, hygiene and healthy living on a series of activities -2007 International Fair

5.2007 Taiwan community safety and security of School Development Seminar

2008:

1. Xinyi District, partners to visit and observe Neihu District and have a commitment of experience with the officers of Neihu District
2. Australia's Monash University, Prof. McClure visits and other activities within Neihu district

3. Thai group visit Neihu Safe Community

International Commitment:

2006:

1. 2680 Rotary Club of Japan visits and observes and has an commitment with the officers of Neihu district
2. International Safe Community Conference - South Africa
3. The officers of Japan (Japan) Aomori Prefecture (Aomori Prefecture) 10 Hotan City (Towada City) to visit and observe and have an commitment with the officers of Neihu District.

2007:

1. 4th Asia Region Safe Community Conference in Thailand, November

2008:

1. Liqun Ma University of Japan visits and observes and have an observation and commitment with the officers of Neihu district
2. 17th International Safe Community Conference, New Zealand, October
3. Asia Safe Community Workshop, Hong Kong
4. 16th Taiwan Strait, Hong Kong and Macau regional seminars

[準則 1]

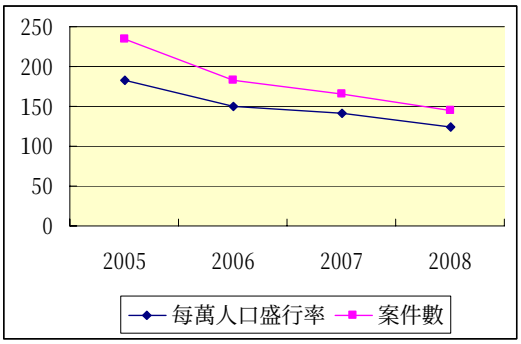
2005 年通過認證後，內湖安全社區的推動主體—「臺北市內湖社區安全與健康協會會」角色從先趨領航者，轉變為督促者，並成立「行動團」，由區內公部門單位（警政、消防、社政、醫療等）以及區內醫院、學校等組成，並固定由區長擔任團長一職，負責各項安全促進方案的實際執行工作；此外，新增 4 個工作推動委員會，「讓內湖區持續朝向多元的安全健康環境」目標邁進。

[準則 2-5]

（1）2006：

居家安全促進

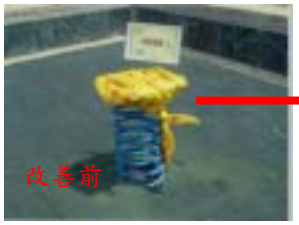
根據事故傷害監測資料分析顯示，幼兒事故傷害發生地點以居家場所為最多。2005 年是以透過婦宣隊「居家安全訪視」的方式進入家戶宣導改善，自 2006 年起改以「我家好安全」方案，透過家訪與攜回居家安全自評表的方式共同進行。2005 年至今幼兒事故傷害已有逐年下降趨勢。



2005~2008 年 0-4 歲幼兒事故傷害數變化圖

救援及休閒運動安全促進

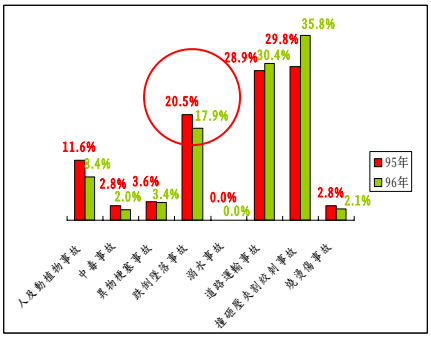
內湖擁有碧湖、大湖這 2 個天然的湖泊、9 條主要登山步道及 52 座鄰里公園，是休閒娛樂的好去處，因此於 2006 年推行「鄰里公園、登山步道不安全點檢核」，大規模實地踏查，並促使公部門納入每 2 個月例行業務檢查範圍。



（2）2007：

交通安全促進

不安全的行路環境會導致行人發生跌倒、車禍等事故傷害事件。2006 年底我們發現在內湖區的跌倒傷害事件中有很高的比例是發生在人行道上，因此，於 2007 年 4 月開始實施「人行道、天橋不安全點檢核修繕計畫」，找出導致事故傷害發生之因子，5 月開始陸續加以改善。而人行道、天橋等人行環境的品質改善對降低跌倒事故傷害是有成效的。



2006、2007 年各事故傷害類型收案百分比比較

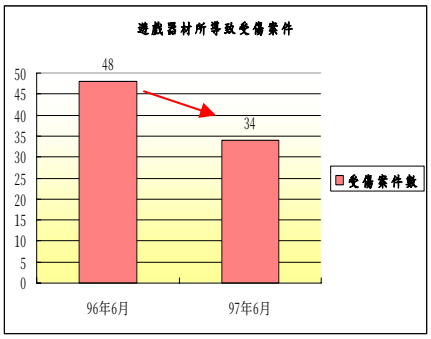
相關設施、環境	95年	96年
騎樓/走廊	19	18
人行道(含天橋、地下道)	62	13
水池/水溝	1	2
井/潛洞/坑洞	1	1
階梯/斜坡	14	7
樹木	2	0
工作梯	1	1
鷹架	0	1

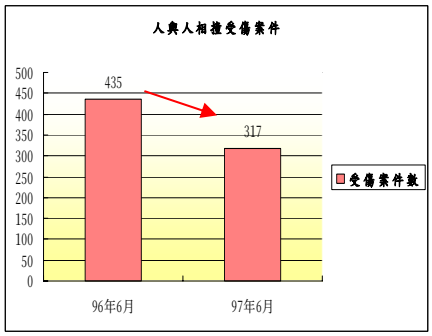
2006、2007 年發生跌倒事故之相關環境收案數比較

（3）2008：

學校安全促進

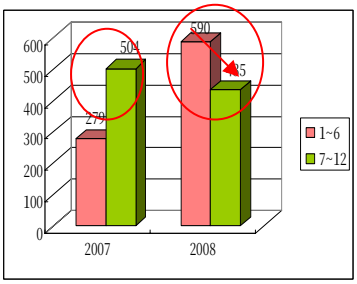
2007 年分析台北市內湖區事故傷害的狀況，我們發現在學校的遊憩場所發生的事故傷害比率係屬台北市內湖區的第 5 位。國小學童因使用學校遊樂場設施而受傷的事件時有所聞。因此於 2008 年展開「校園安全小尖兵計畫」，落實校園安全預防促進工作，將安全促進工作推展由小做起。首先擇定一所小學施行，成效良好，並成為校內每學年首推之例行工作。預計將於 2009 年擴大執行。



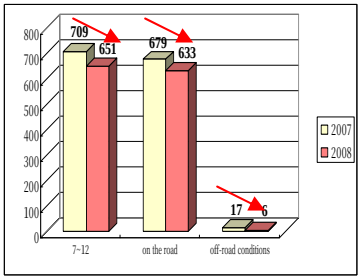


交通安全促進

延續 2005 年「捷運內湖線圍籬外施工品質改善計畫」，於 2008 年 4 月起大規模檢核內湖沿線周邊環境之不安全點，5 月起陸續進行改善，並藉以評估該計畫在跌倒、道路運輸事故等傷害預防上之成效，我們發現捷運施工路段周邊行路環境改善計畫確實對傷害預防有很大的幫助。



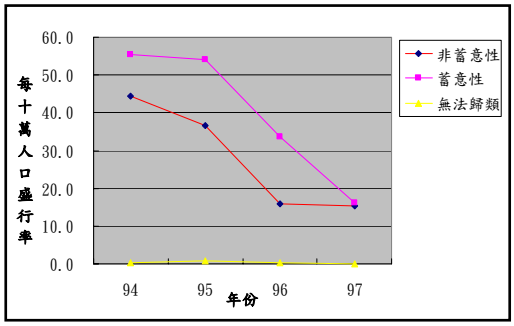
2007、2008 年跌倒墜落事故傷害收案件數變化圖



2007、2008 年道路運輸事故傷害收案件數變化圖

蓄意性傷害防制

為擴大宣導並預防蓄意性傷害事件的發生，搭配區內 1 家賣場於販賣木炭處張貼溫馨小提醒及海報、於政府出版品刊登文章介紹內湖社區建構蓄意性傷害防制網絡概況，讓民眾可立即獲得相關資訊並尋求幫助管道，預計 2009 年增加賣場共同宣導。讓內湖區處處有愛，處處溫暖，蓄意性事故傷害案件有逐年下降的趨勢。



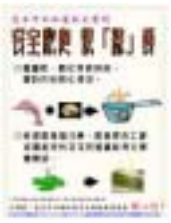
2005 至 2008 年內湖區人致傷事故之事故類屬趨勢圖

病人安全促進

針對使用慢性病連續處方箋且用藥不安全性高的高危險群民眾使用，設計用藥安全標示貼紙，並進行貼紙使用前後的問卷滿意度分析。共發出問卷 200 份，其中有 38 位長者認為藥袋貼紙的使用，改善了忘記服藥的問題，有 46 位長者改善吃錯藥的問題，有 42 位長者改善錯誤服藥時間的問題，有 48 位長者改善吃錯藥物劑量的問題，更有 82.8%的受測長者認為標示貼紙可以減少錯誤用藥的機率。

農業用藥與食品安全促進

由於近年來食品食用方式不當的新聞頻傳，導致許多事故傷害的事件發生，且內湖區大賣場林立，結合賣場共同宣導食品食用安全更是當務之急，因此於 2008 年結合區內 1 家賣場共同推行，於節慶時節推廣食品食用安全，預計 2009 年增加賣場共同宣導。



[準則 6]

國內交流：

2006：

1.台灣安全社區發展研討會

2.臺北市政府衛生局深耕社區成果發表研討會

2007：

3.世新大學新聞系學習交流

4.北京大學吳季松院長到訪內湖安全社區

5.東勢安全學校研討會

6.第一屆臺灣健康月系列活動-2007 生活健康國際博覽會

7.2007 台灣社區安全與安全學校發展研討會

2008：

8.信義區夥伴至內湖區拜訪經驗交流

9.澳洲 Monash 大學 Prof. McClure 內湖參訪活動

10. 泰國團體參訪內湖安全社區

國際交流：

2006：

1.日本扶輪社 2680 地區至內湖觀摩交流

2.國際安全社區研討會－南非

3.日本(Japan)青森県(Aomori Prefecture)十和田市(Towada City) 至內湖觀摩交流.

2007：

4.4th Asia Region Safe Community Conference in Thailand, November

2008：

5.日本國立群馬大學至內湖觀摩交流

6.17th International Safe Community Conference, New Zealand, October, 2008

7.Asia Safe Community Workshop, Hong Kong. 2008

8.第十六屆海峽兩岸及香港、澳門地區研討會
